...as well as many other independent retailers throughout Australia!

If your local cafe doesn't stock ethical coffee, [give them a card and ask them to!](#)

*World Vision Australia uses the term 'ethically sourced' to refer to coffee that is independently certified to have been harvested without the use of forced, child or trafficked labour. Other companies may also claim their products to be ethical and sustainably sourced, however World Vision Australia would encourage them to provide verification by a credible independent party that ethical practices were used throughout its product, in order to provide the most credible assurance to customers.*
